General Comments Adjusted sale prices of comparables present a value range from \$156,090 to \$233,000. Yet, after evaluation of 3 comparable sales and the Subject location, we consider reasonable to conclude for a rounded value opinion of \$190,000, which is supported by the rounded average indication of all three sales. Due to the Subject Design, the use of sales that transpired more than six months prior to the effective date of the appraisal and that are located above the recommended one mile distance was unavoidable. Adjustments were applied for dissimilarities recognized by market, gross living area and additional features. In reference to Gross Living Area variance were adjusted at \$25.00 per square foot, the amount was extracted using pair sales analysis with data kept in work file
